You can use these images with anyone who has difficulty communicating.

How to use?

- Place the board where the person can see it.
- When asking a question, also point to the associated image. For example: "Do you have pain?" while at the same time pointing to the pain scale.
- If the person has difficulty understanding what is being asked, ask simple yes/no questions, for example: "Are you in pain? Are you bleeding?"
- If the person cannot say yes/no verbally or cannot nod, offer alternative solutions, e.g. close your eyes for yes, move your index finger for no.
- If the person cannot point to the images with his/her finger and select, say the images on the page one by one and make him/her select. You can make it easier to follow by presenting it column by column "Is what you want to say here? I have pain, where is my family, I can't see" etc.
- If you do not understand what is being said and if this is possible, ask the person to spell it out using the alphabet board.
